HSE Officer (FMCG)

Description

Chloe Hygiene and Baby Products is seeking a dedicated and proactive HSE Officer to oversee health, safety, and environmental compliance in our water production facility. The ideal candidate will ensure a safe workplace, enforce regulatory standards, and promote a culture of safety among employees.

Responsibilities

Health & Safety Compliance

- Implement and enforce health and safety policies to ensure compliance with local and international regulations.
- Conduct risk assessments and recommend preventive measures to reduce workplace hazards.
- Ensure the proper use and maintenance of Personal Protective Equipment (PPE) by all employees.
- Investigate and document accidents, incidents, and near misses, providing recommendations for corrective actions.
- Develop emergency response plans and coordinate safety drills.

Environmental Management

- Monitor and enforce environmental regulations related to water production, waste disposal, and pollution control.
- Ensure compliance with waste management, water treatment, and hygiene standards in production processes.
- Conduct environmental impact assessments and implement sustainable practices.

Training & Awareness

- Organise HSE training sessions for staff on workplace safety, fire prevention, first aid, and emergency procedures.
- Raise awareness about hazard identification, risk mitigation, and best safety practices in the workplace.
- Maintain records of training, inspections, and compliance reports.

Regulatory & Compliance Oversight

- Liaise with regulatory bodies such as NAFDAC, SON, NESREA, and OSHA to ensure full compliance with industry standards.
- Keep up-to-date with HSE laws, policies, and industry best practices to enhance workplace safety.
- Conduct regular audits and inspections of production facilities, ensuring

adherence to safety protocols.

Qualifications

- Bachelor's degree or HND in Environmental Science, Occupational Health & Safety, Engineering, or a related field.
- Professional certifications such as NEBOSH, IOSH, ISPON, or HSE Level 1-3 are an added advantage.
- Minimum of 3 years' experience in HSE, preferably in the food and beverage or water production industry.
- Strong knowledge of workplace safety standards, risk assessment, and regulatory compliance.
- Excellent communication, training, and report-writing skills.
- Ability to work proactively, solve problems, and enforce safety measures effectively.
