Senior Angular Developer (Banking)

Description

We are seeking a highly skilled Senior Angular Developer to build and maintain secure, high-performance front-end applications for our banking platforms. The ideal candidate will have experience developing enterprise-grade financial applications, working with sensitive data, and adhering to industry compliance and security standards.

Responsibilities

- Design, develop, and maintain secure, scalable front-end applications using Angular (latest versions)
- Lead front-end development for banking products such as digital banking portals, payment platforms, and internal dashboards
- Collaborate with backend, security, compliance, and product teams
- Implement best practices for security, performance, and accessibility
- Ensure compliance with banking regulations, data privacy, and security standards
- Integrate front-end applications with secure RESTful and microservices APIs
- Optimize applications for speed, scalability, and reliability
- Conduct code reviews and mentor junior developers
- Identify and mitigate front-end security risks (XSS, CSRF, authentication flows)
- Participate in Agile/Scrum ceremonies and sprint planning

Qualifications

- Bachelor's degree in computer science, Engineering, or related field (or equivalent experience)
- 5+ years of front-end development experience
- 5+ years hands-on experience with Angular
- Strong proficiency in TypeScript, JavaScript, HTML5, CSS3
- Strong experience consuming RESTful APIs and secure backend services
- Solid understanding of RxJS, NgRx, and state management
- Experience with authentication and authorization mechanisms (OAuth2, JWT, SSO)
- Proficiency with Git and modern development workflows.
